ANNEX

OF MOBILE OFFSHORE DRILLING UNITS, 2009

(2009 MODU CODE)

CHAPTER 10

LIFE-SAVING APPLIANCES AND EQUIPMENT

1 Paragraphs 10.14, 10.14.1 and 10.14.2 are replaced by the following:

"10.14 [Reserved*]

_____

* The provisions related to radio life -saving appliances were relocated under chapter 11
(refer to

resolution MSC.506(105). Paragraph 10.14 was intentionally left blank to avoid renumbering
of

existing paragraphs."

CHAPTER 11

RADIOCOMMUNICATION AND NAVIGATION

2 The text of chapter 11 is replaced by the following:

■11.1 General

The purpose of this chapter is to provide minimum provisions for navigation equipment and
for

distress and safety radiocommunications between mobile offshore drilling units, including

associated survival craft, and coast stations, ships and supporting aircraft.

11.2 Training

URL:

https://wwwcdn.imo.org/localresources/en/KnowledgeCentre/IndexofIMOResolutions/MSCResolutions/MSC.506(105).pdf
associated survival craft, and coast stations, ships and supporting aircraft.

11.2 Training

Training in the use of IMO Standard Marine Communication Phrases should be provided to personnel responsible for radio communications.1

_____

1 Refer to IMO Standard Marine Communication Phrases (resolution A.918(22)).

11.3 Self-propelled units

Each unit should comply with the applicable provisions concerning radio stations for cargo ships in SOLAS chapter IV.2

_____

2 All requirements of SOLAS chapter IV referring to ■from the position from which the ship is
normally navigated■ should be appl ied as meaning ■from the position the MODU is normally navigated■.

11.4 Non-self-propelled units under tow

11.4.1 The provisions for non-self-propelled units under tow when manned depend upon the radio installations fitted in the towing ship, as set out in paragraphs 11.4.2 and 11.4.3.

RESOLUTION MSC.506(105) (adopted on 28 April 2022)

URL:
https://wwwcdn.imo.org/localresources/en/KnowledgeCentre/IndexofIMOResolutions/MSCResolutions/MSC.506(105).pdf
radio installations fitted in the towing ship, as set out in paragraphs 11.4.2 and 11.4.3.
RESOLUTION MSC.506(105) (adopted on 28 April 2022)

11.4.2 In cases where the towing ship complies fully with all applicable requirements concerning radiocommunications for ships prescribed in SOLAS chapter IV, the unit under tow when manned should:

.1 be fitted with VHF facilities as required by SOLAS regulations IV/7.1.1 3 and 7.1.2 and with MF facilities as required by regulations IV/9.1.1 and 9.1.2;

.2 be fitted with an EPIRB as required by SOLAS regulation IV/7.1.5; and

.3 be fitted with receiver(s) capable of re ceiving MSI and SAR related information throughout the entire voyage in which the unit is engaged in accordance with SOLAS regulation IV/7.1.4.
