or arrangements: .1 provide safety standards at least equivalent to the requirements of this chapter and have been evaluated and tested in accordance with the recommendations o f the Organization;** or .2 have successfully undergone, to the satisfaction of the Admi nistration, evaluation and tests which are substantially equivalent to those recommendat ions.

8.1.5 Before accepting life-saving appliances and arrangements that have not been previo usly approved by the Administration, the Administration should be satisfied that life-sa ving appliances and arrangements comply with the requirements of this chapter.

8.1.6 Except where otherwise provided in this Code, life-saving appliances required by t his chapter for which detailed specifications are not included in part C of chapter III of the Convention should be to the satisfaction of the Arnninistration.

* Refer to the Recommendation on testing of life-saving appliances, adopted by the Organ ization by resolution A.689(17).

** Refer to the Code of practice for the evaluation, testing and acceptance of prototype novel life-saving appliances and arrangements, adopted by the Organization by resolution A.520(13).

- by the Organization by resolution A.689(17).

** Refer to the Code of practice for the evaluation, testing and acceptance of prototype novel life-saving appliances and arrangements, adopted by the Organization by resolution A.520(13).

W/1687n/pp/EWP RESOLUTION MSC.36(63) (adopted on 20 May 1994) ADOPTION OF THE INTERNATIO NAL CODE OF SAFETY FOR HIGH SPEED CRAFT MSC 62123/Add.2 ANNEX 18 Page 82 8.1.

7 8.1.

8 8.1.

9 8.1.10 The Administration should require life-saving appliances to be subjected to suc h production tests as are necessary to ensure that the life-saving appliances are manufa ctured to the same standard as the approved prototype.

Procedures adopted by the Administration for approval should also include the conditions whereby approval would continue or would be withdrawn.

The Administration should determine the period of acceptability of life-saving appliance s which are subject to deterioration with age.

Such life-saving appliances should be marked with a means for determining their age or t he date by which they should be replaced.

For the purposes of this chapter, unless expressly provided otherwise: - Such life-savin g appliances should be marked with a means for determining their age or the date by whic h they should be replaced.

For the purposes of this chapter, unless expressly provided otherwise: .

1 "Detection" is the determination of the location of survivors or survival craft .

.

2 "Embarkation ladder" is the ladder provided at survival craft embarkation stations to permit safe access to survival craft after launching • .

3 "Embarkation station" is the place from which a survival craft is boarded.

An embarkation station may also serve as a muster station, provided there is sufficient room, and the muster station activities can safely take place there .

.

4 "Float-free launching" is that method of launching a survival craft whereby the craft is automatically released from a sinking craft and is ready for use .

.

5 "Free-fall launching" is t
