RESOLUTION MSC.139(76) (adopted on 5 December 2002) MANDATORY SHIP REPORTING SYSTEMSMSC 76/23/Add.1 Page 4 I:\MSC\76\23-ADD.1.DOC A ship must give a short position report by vo ice or by AIS when entering the mandatory ship reporting area.

The full report may be give n by voice or by non-verbal means.

A ship may elect, for reasons of commercial confidentiality, to communicate that section of the report which provides information on cargo by non-verbal means prior to entering the ship reporting area.

When leaving port, the ship can give the full report to the ship reporting system by voi ce or by non-verbal means.

3.1 Format 3.1.1 The information given below is derived from the format-type given in pa ragraph 2 of the appendix to resolution A.851(20).

3.2 Content 3.2.1 A short report by voice or by AIS from a sh ip to the shore-based auth orities should contain the following information: A Name of the ship, call sign or IMO i dentification number (or MMSI for transponder reports) B Date and Time (UTC) C or D Posi tion (expressed in latitude and longitude or bearing to and distance from a landmark) E and F Course and speed of the ship - transponder reports) B Date and Time (UTC) C or D P osition (expressed in latitude and longitude or bearing to and distance from a landmark) E and F Course and speed of the ship 3.2.2 A full report from a ship to the shore-ba sed authorities by voice or by non-verbal means should contain the following information: I Destination and ETA L Route information O Vessel’s draught P Hazardous cargo, class and quantity, if applicable Q or R Breakdown, damage and/or deficien cies affecting the stru cture, cargo or equipment of the ship or any other circumstances affecting normal naviga tion in accordance with the provisions of the SOLAS and MARPOL Conventions T Contact inf ormation of ship’s agent or owner U Ship’s deadweight tonnage W Total number of persons on board X Miscellaneous remarks, e.g.

ice class, amount and nature of bunkers if over 5000 tons, navigational status Note: On receipt of a position message, the system operators will establish the relationship betw een the ship’s position and the information supplied by the position-fixing equipment av ailable to them.

Information on course and speed will help operators to identify one - between the ship’s position and the information supplied by the position-fixing equipment available to them .

Information on course and speed will help operators to identify one ship among a group o f ships.

This will be achieved automatically if AIS transponder is used.

All VHF-, telephone-, radar-, AIS- and other relevant information will be recorded and t he records stored for 30 days.
