THE MARINE ENVIRONMENT PROTECTION COMMITTEE, RECALLING Article 38(a) of the Convention o n the International Maritime Organization concerning the functions of the Marine Environ ment Protection Committee (the Committee) conferred upon it by international conventions for the prevention and control of marine pollution, RECALLING ALSO that, at its sixty-se cond session, the Committee adopted, by resolution MEPC.203(62), amendments to the Annex of the Protocol of 1997 to amend the International Convention for the Prevention of Poll ution from Ships, 1973, as modified by the Protocol of 1978 relating thereto (inclusion of regulations on energy efficiency for ships in MARPOL Annex VI), NOTING that regulatio n 21 (Required EEDI) of MARPOL Annex VI, as amended, requires - of 1978 relating thereto (inclusion of regulations on energy efficiency for ships in MARPOL Annex VI), NOTING tha t regulation 21 (Required EEDI) of MARPOL Annex VI, as amended, requires reference lines to be established for each ship type to which regulation 21 is applicable, HAVING CONSID ERED, at its sixty-third session, the draft Guidelines for calculation of reference line s for use with the Energy Efficiency Design Index (EEDI), ADOPTS the Guidelines for calc ulation of reference lines for use with the Energy Efficiency Design Index (EEDI), as se t out at annex to the present resolution.

RESOLUTION MEPC.215(63) Adopted on 2 March 2012 GUIDELINES FOR CALCULATION OF REFERENCE LINES FOR USE WITH THE ENERGY EFFICIENCY DESIGN INDEX (EEDI)MEPC 63/23/Add.1 Annex 11, p age 2 I:\MEPC\63\23-Add-1.doc ANNEX GUIDELINES FOR CALCULATION OF REFERENCE LINES FOR US E WITH THE ENERGY EFFICIENCY DESIGN INDEX (EEDI) 1 The reference lines are established f or each ship type to which regulation 21 (Required EEDI) of MARPOL Annex VI is applicabl e.

The purpose of the EEDI is to provide - ENERGY EFFICIENCY DESIGN INDEX (EEDI) 1 The refe rence lines are established for each ship type to which regulation 21 (Required EEDI) of MARPOL Annex VI is applicable.

The purpose of the EEDI is to provide a fair basis for comparison, to stimulate the deve lopment of more efficient ships in general and to establish the minimum efficiency of ne w ships depending on ship type and size.

Hence, the reference lines for each ship type is calculated in a transparent and robust manner.

2 Ship types are defined in regulation 2 of MARPOL Annex VI.

The reference line for each ship type is used for the determination of the required EEDI as defined in regulation 21 of MARPOL Annex VI.

3 These guidelines apply to the following ships types: bulk carrier, gas carrier, tanker , containership, general cargo ship, refrigerated cargo carrier and c
