.3 an approved method is not yet commercially available as described in paragraph 7.2 of this regulation; or .4 an approved method is not applicable.

7.4 Subject to regulation 3 of this Annex, the operation of a marine diesel engine descr ibed in paragraph 7.1 of this regulation is prohibited, except when the emission of nitr ogen oxides (calculated as the total weighted emission of NO 2) from the engine is withi n the following limits, where n = rated engine speed (crankshaft revolutions per minute) : .1 17.0 g/kWh when n is less than 130 rpm; .2 45 n(–0.2) g/kWh when n is 130 or more b ut less than 2,000 rpm; and .3 9.8 g/kWh when n is 2,000 rpm or more.

25 Refer to the 2014 Guidelines on the approved method process (resolution MEPC.243(66)) .

26 Refer to the 2014 Guidelines in respect of the information to be submitted by an Admi nistration to the Organization covering the certification of an approved method as requi red under regulation 13.7.1 of MARPOL Annex VI (resolution MEPC.242(66)).

RESOLUTION MEPC.403(83) (adopted on 11 April 2025) AMENDMENTS TO THE 2022 GUIDELINES ON SURVEY AND CERTIFICATION - MARPOL Annex VI (resolution MEPC.242(66)).

RESOLUTION MEPC.403(83) (adopted on 11 April 2025) AMENDMENTS TO THE 2022 GUIDELINES ON SURVEY AND CERTIFICATION OF THE ENERGY EFFICIENCY DESIGN INDEX (EEDI)MEPC 83/17/Add.1 An nex 11, page 29 I:\MEPC\MEPC 83-17-Add.1.docx 7.5 Certification of an approved method sh all be in accordance with chapter 7 of the revised NOx Technical Code 2008 and shall inc lude verification: .1 by the designer of the base marine diesel engine to which the appr oved method applies that the calculated effect of the approved method will not decrease engine rating by more than 1.0%, increase fuel consumption by more than 2.0% as measured according to the appropriate test cycle set forth in the revised NOx Technical Code 2008 , or adversely affect engine durability or reliability; and .2 that the cost of the appr oved method is not excessive, which is determined by a comparison of the amount of NO x reduced by the approved method to achieve the standard set forth in paragraph 7.4 of thi s regulation and the cost of purchasing and installing such approved method.27 Certifica tion - by a comparison of the amount of NO x reduced by the approved method to achieve t he standard set forth in paragraph 7.4 of this regulation and the cost of purchasing and installing such approved method.27 Certification 8 The revised NOx Technical Code 2008 s hall be applied in the certification, testing and measurement procedures for the standar ds set forth in this regulation.

9 The procedures for determining NO x emissions set out in the revised NO x Technical Co de 2008 are intended to be representative of the normal operation of the engine.

Defeat devices and irrational emission control strategies undermine this intention and s hall not be allowed.

This regulation shall not prevent the use of auxiliary control devices that are used to protect the engine and/or its ancillary equipment against operating conditions that coul d result i
