63 Refer to the 2022 Guidelines on operational carbon intensity indicators and the calcu lation methods (CII guidelines, G1) (resolution MEPC.352(78)), and the 2022 Interim guid elines on correction factors and voyage adjustments for CII calculations (CII guidelines , G5) (resolution MEPC.355(78)).

RESOLUTION MEPC.403(83) (adopted on 11 April 2025) AMENDMENTS TO THE 2022 GUIDELINES ON SURVEY AND CERTIFICATION OF THE ENERGY EFFICIENCY DESIGN INDEX (EEDI)MEPC 83/17/Add.1 An nex 11, page 50 I:\MEPC\MEPC 83-17-Add.1.docx 2 Within three months after the end of eac h calendar year, the ship shall report to its Administration, or any organization duly a uthorized by it,64 the attained annual operational CII via electronic communication and using a standardized format developed by the Organization.65 3 Notwithstanding 1 and 2 o f this regulation, in the event of any transfer of a ship addressed in regulations 27.4, 27.5 or 27.6 completed after 1 January 2023, a ship shall, after the end of the calendar year in which the transfer takes place, calculate and report the attained annual operati onal CII for the full 12 -month period from 1 January to 31 December in the - the end of the calendar year in which the transfer takes place, calculate and report the attained a nnual operational CII for the full 12 -month period from 1 January to 31 December in the calendar year during which the transfer took place, in accordance with regulations 28.1 and 28.2, for verification in accordance with regulation 6.6 of this Annex, taking into account guidelines developed by the Organization.

66 Nothing in this regulation relieves any ship of its reporting obligations under regul ation 27 or this regulation of this Annex.

Required annual operational carbon intensity indicator (required annual operational CII) 4 For each ship of 5,000 gross tonnage and above which falls into one or more of the cat egories in regulations 2.2.5 to 2.2.7, 2.2.9, 2.2.12 to 2.2.14, 2.2.20, and 2.2.24 to 2. 2.27 of this Annex, the required annual operational CII shall be determined as follows: Required annual operational CII = (1 – Z100) • CIIR where, Z is the annual reduction fac tor to ensure continuous improvement of the ship's operational carbon intensity within a specific rating level; and CIIR is the reference value.

- Required annual operational CII = (1 – Z100) • CIIR where, Z is the annual reduction f actor to ensure continuous improvement of the ship's operational carbon intensity within a specific rating level; and CIIR is the reference value.

5 The annual reduction factor Z 67 and the reference value CII R shall be the values def ined taking into account the guidelines to be developed by the Organization.68 Operation al carbon intensity rating 6 The attained annual operational CII shall be documented and verified against the required annual operational CII to determine operational carbon int ensity rating A, B, C, D or E, indicating a major superior, minor superior, moderate, mi nor inferior or inferior performance level, either by the Administration or by any organ ization duly authorized by it, 69 taking into 64 Refer to the Code
