THE MARINE ENVIRONMENT PROTECTION COMMITTEE, RECALLING Article 38(a) of the Convention o
n the International Maritime Organization (the Committee) concerning the functions of th
e Marine Environment Protection Committee conferred upon it by international conventions
for the prevention and control of marine pollution from ships, RECALLING ALSO that at it
s seventy -second session, the Committee adopted resolution MEPC.304(72) on Initial IMO
Strategy on Reduction of GHG Emissions from Ships (Initial Strategy), NOTING that the In
itial Strategy calls for the development of robust life cycle GHG/carbon intensity guide
lines for all types of fuels, in order to prepare for an implementation programme for ef
fective uptake of alternative low-carbon and zero-carbon fuels, NOTING ALSO that at its
eightieth session, the Committee adopted resolution MEPC.377(80) - for effective uptake
of alternative low-carbon and zero-carbon fuels, NOTING ALSO that at its eightieth sessi
on, the Committee adopted resolution MEPC.377(80) on the 2023 IMO Strategy on Reduction
of GHG Emissions from Ships (2023 IMO Strategy) setting out the levels of ambition for t
he international shipping sector in reducing GHG emissions, NOTING FURTHER that the 2023
IMO Strategy provides that the levels of ambition and indicative checkpoints should take
into account the well -to-wake GHG emissions of marine fuels as addressed in the guideli
nes on life cycle GHG intensity of marine fuels dev eloped by the Organization, NOTING t
hat the 2023 IMO Strategy provides that the basket of candidate mid -term GHG reduction
measures should take into account the well-to-wake GHG emissions of marine fuels as addr
essed in the guidelines on life cy
