(Modules specified in Appendix 4) Module B: ■Operational and functional requirements■ Pr
esentation of AIS data Collision avoidance (7.4) Navigation control data (7.5) MSC.74 (6
9), Annex 3 Echo sounding system Route monitoring (7.3) MSC.74(69), Annex 4 EPFS Navigat
ion control data (7.5) or Navigation status and data display (7.7) GPS Res.

A.819(19), as amended, MSC.112(73) or GALILEO, Res.

MSC.233(82) or GLONAS, Res.

MSC.53(66), as amended MSC.113(73) SDME Navigation control data (7.5) or Navigation stat
us and data display (7.7) Res.

MSC.96(72) 3.6 The application of the alert management is specified in module C.

3.7 Other relevant standards 3.7.1 The workstation design, layout and arrangeme nt is no
t addressed in this performance standards, but in MSC/Circ.982.

RESOLUTION MSC.252(83) (adopted on 8 October 2007) ADOPTION OF THE REVISED PERFORMANCE S
TANDARDS FOR INTEGRATED NAVIGATION SYSTEMS (INS)MSC 83/28/Add.3 ANNEX 30 Page 6 I:\MSC\8
3\28-Add-3.doc 4 Definitions For the purpose of these standards the definitions in Appen
dix 1 apply.

Module A ■ Integration of Information - INTEGRATED NAVIGATION SYSTEMS (INS)MSC 83/28/Add
.3 ANNEX 30 Page 6 I:\MSC\83\28-Add-3.doc 4 Definitions For the purpose of these standar
ds the definitions in Appendix 1 apply.

Module A ■ Integration of Information 5 Requirements for integration of navigational inf
ormation 5.1 Interfacing and data exchange 5.1.1 An INS should combine, process and eval
uate data from connected sensors and sources.

5.1.2 The availability, validity and integrity of data exchange within the INS and from
connected sensors and sources should be monitored.

5.1.3 A failure of data exchange should no t affect any independent functionality.

5.1.4 Interfacing to, from, and within the INS s hould comply with international standar
ds for data exchange and interfacing as appropriate.

5.1.5 The interface(s) should comp ly with the interface requireme nts of the alert mana
gement as described in Module C of these performance standards.

5.2 Accuracy 5.2.1 INS data should comply with the accuracy and resolution required by a
pplicable performance standards of the Organization.

5.3 Validity, plausibility, latency 5.3.1 Validity - 5.2 Accuracy 5.2.1 INS data should
comply with the accuracy and resolution required by applicable performance standards of
the Organization.

5.3 Validity, plausibility, latency 5.3.1 Validity 5.3.1.1 Data failing validity checks
should not be used by the INS for functions dependent on these data, unless for cases wh
ere the relevant performance standards specifically allow use of invalid data.

There should be no side effects for functions not depending on this data.

5.3.1.2 When data used by the INS for a function becomes invali d, or unavailable, a war
ning should be given.

When data not actually in use by the INS becomes invalid, or unavailable, a this should
be indicated at least as a caution.

5.3.2 Plausibility 5.3.2.1 Received or derived data that is used or distributed by the I
NS should be checked for plausible
