The term specially suitable compartment, partly filled in way of the hatch opening, with
ends untrimmed refers to a specially suitable compartment which is not filled to the max
imum extent possible in way of the hatch opening but is filled to a level equal with or
above the bottom edge of the hatch end beams and has not been trimmed outside the periph
ery of the hatch opening by the provisions of A 10.4." 10 Stowage of bulk grain 2 The re
ference to "B 6" in paragraph 10.3.1 is replaced with "B 7".

3 The following new paragraph is inserted after existing paragraph 10.3 and the subseque
nt paragraphs are renumbered accordingly: "10.4 In any "specially suitable compartment,

are renumbered accordingly: "10.4 In any "specially suitable compartment, partly filled
in way of the hatch opening, with ends untrimmed", the bulk grain shall be filled to a l
evel equal with or above the bottom edge of the hatch end beams but may be at its natura
l angle of repose outside the periphery of the hatch opening.

A compartment may qualify for this classification if it is "specially suitable" as defin
ed in A 2.7, in which case dispensation may be granted from trimming the ends of that co
mpartment." 4 Renumbered paragraph 10.7 (existing paragraph 10.6) is replaced by the fol
lowing: "10.7 After loading, all free grain surfaces in partly filled compartments shall
be level unless the compartment is partly filled in accordance with the provisions of A
10.4, in which case the free grain surface in way of the hatch opening only shall be lev

However, if feeding holes are provided in the hatch end beams in accordance with table B 1-2 and the free grain surface in way of the hatch opening is above the level of the fee ding holes, then the surface of the grain after loading shall be assumed to slope in all directions, at an angle of 30° from a line on the hatch end beam which is the mean of th e peaks and valleys of the actual grain surface as shown in figure B-1." 9 The reference to "B 5" in paragraph 1.2 is replaced with "B 6".

10 Paragraph 1.5 is replaced by the following: "1.5 In "partly filled compartments" and "specially suitable compartments, partly filled in way of the hatch opening, with ends u ntrimmed", the adverse effect of the vertical shift of grain surfaces shall be taken int o account as follows: Total heeling moment = 1.12 x calculated transverse heeling moment ." --- URL: https://wwwcdn.imo.org/localresources/en/KnowledgeCentre/IndexofIMOResolutio ns/MSCResolutions/MSC.552(108).pdf vertical shift of grain surfaces shall be taken into account as follows: Total heeling moment = 1.12 x calculated transverse heeling moment." 2 Assumed volumetric heeling moment of a filled compartment, trimmed 11 The reference to "A 10.9" in paragraph 2.6 is replaced with "A 10.10".
