New IMO data sets

The new version of the IMO Compendium approved by FAL 50 includes the following new IMO data sets:

- IMO data set on the delivery bill for mail consignment as described in the Acts of the Universal Postal Union, the Universal Postal Convention and its Regulations currently in force
- IMO data set on the Ship Sanitation Control Exemption Certificate or Ship Sanitation Control Certificate or extension as set forth by the International Health Regulations
- IMO data set on Meteorological and oceanographic observations
- IMO data set on Seafarers Related Information and STCW Certificates as work in progress

Code lists maintained by IMO

Additional code lists maintained by the IMO and amendments to existing ones can be found in the section Codes maintained by IMO.

Amendments to the previous version of the IMO Compendium

The changes made in respect to the previous version in FAL.5/Circ.55 are identified in the section overview of changes.

Corrections to the current version of the IMO Compendium

None.

If corrections are required before a new version of the Compendium is published, they are identified under this section.
